## **Vienna International Airport Traffic development in August influenced by decline in charters**

During the month of August flight movements and maximum take-off weight rose slightly by 0.4% and 0.5%, respectively, while the number of transfer passengers showed solid growth of 4.4%. The total number of passengers handled by Vienna International Airport in this month declined by 3.4%, primarily due to a drop in tourism-related charters and the flood disasters in central Austria. Cargo volume recorded a further strong increase of 9.6%.

From January to August the total number of passengers declined by 3.3%, but transfers increased by 7.8%. Flight movements decreased by 1.4% and maximum take-off weight by 5.8%.

For 2002 Vienna International Airport expects a slight increase of 1% in the total number of passengers, a minus of 1% in flight movements, and decline of 4% in maximum take-off weight.
